

# Equipment Engineer

- with Radisurf

Are you looking for the opportunity to be part of designing, analyzing, maintaining and optimizing newly developed production equipment for a fast growing startup company, with a strong global strategy? Do you possess an entrepreneurial spirit as well as being a highly collaborative, excellent communicator? This might be the right opportunity for you to join our team.

Radisurf is a rapidly growing global innovator of cutting-edge nanocoating processes. An exciting, early stage technology company on a mission to create and provide the most sustainable industrial adhesion technologies.

## Job Description:

As our new equipment manager, you will be in charge of providing the proper equipment for the job, either on-site or off-site. You will also manage daily operations for equipment procurement, inventory management and maintenance functions.

- **designing and analysing production equipment for various projects and clients**
- **testing and overseeing the production of equipment**
- **performing extensive and complex repairs on existing equipment**
- **estimated traveling time, up to 20 or 30%**

## Background and Qualifications:

- **at least a bachelor degree, preferably a master's degree in engineering including science courses, physics and chemistry in the curriculum**
- **experience in both mechanical and electronic equipment**
- **at least 5 to 10 years of experience**

You will be working in a very innovative company, with a strong supportive culture. We are providing a laid back, yet highly professional working environment.
