

Lead Chemist / Head of Chemistry

- with Radisurf

Are you looking to be deeply involved in many future-defining projects? a role with responsibility with room for ideas & a creative mind? We are now looking for a experienced hands-on Lead Chemist to take responsibility for planning & coordinating R&D projects

Radisurf is a rapidly growing global innovator of cutting-edge nanocoating processes. An exciting, early stage technology company on a mission to create and provide the most sustainable industrial adhesion technologies.

Job Description:

You will be a hands-on leading figure in our chemical development team in direct collaboration with the CTO. Your areas of responsibility will include:

- **leading and guiding the team**
- **planning and coordinating R&D projects based on our polymer brush technology**
- **maturing chemical processes towards large volume manufacturing. Experience in scaling chemical processes is an advantage**
- **explore and testing greenfield applications of polymer brushes**

You will be working in a fast growing innovative Danish startup with a strong supportive culture. We are providing a laid back, yet highly professional working environment.

Background and Qualifications:

- **at least a master's degree, preferably a PhD in chemistry. At least 5 years of relevant experience with R&D chemistry from industry**
- **you are a skilled and experienced organic or polymer-chemist with a desire to combine your strong theoretical knowledge with the practical experimentations in the lab**
- **you are hard-working, structured, a motivated leader with a curiosity to keep your knowledge up to date**
- **experience in patent writing and strategy is an advantage**
